Career Objective:

Aspiring **Machine Learning Engineer** with strong expertise in data preprocessing, visualization, and predictive modelling. Seeking to contribute to a forward-thinking organization by applying data-driven solutions that enhance decision-making and business growth.

Education:

B.E. in Computer Science and Engineering

Mar Ephraem College of Engineering and Technology — 2022 - present

Higher Secondary Education (Class XII)

St. Mary's Matric Hr Sec School — 2021 – 2022

Secondary Education (Class X)

St. Mary's Matric Hr Sec School — 2019 – 2020

Skills:

- **Programming:** Python, SQL
- **Data Analytics:** Pandas, NumPy, EDA, Data Visualisation (Matplotlib, Seaborn, Power BI)
- **Machine Learning:** Regression, Classification, Feature Engineering, Model Evaluation.
- **Soft Skills:** Adaptability & Continuous Learning, Analytical Thinking

Projects:

1. Waste Segmentation using Deep Learning

- Implemented an image segmentation model to classify waste into categories using Convolutional Neural Networks.
- Applied data preprocessing and augmentation techniques to improve the accuracy.
- Achieved 85% accuracy on test data, demonstrating potential for smart waste management.

2. Customer Churn Prediction

- Built a predictive model to identify customers likely to discontinue services based on usage patterns.
- Performed data cleaning, feature engineering and exploratory data analysis using Python.
- Trained classification models like Random Forest classifier, XG boost and reduced prediction error by 16% using hyperparameter tuning.

Certifications:

- Basic to Advanced Mathematics for Data Science – Udemy
- Data Science Masters – Udemy
- Python Algorithms and Data Structures – Udemy
- Python Basics – HackerRank

Achievements:

- Secured First Position in **Code Debugging** at a National-Level Tech Symposium conducted by Maria College of Engineering and Technology
- Served as **Assistant Patrol Leader** in Scout Patrol during Presidential Camp, demonstrating teamwork and leadership skills

Hobbies:

- Solving coding challenges in sites like Codewars and LeetCode
- Exploring emerging technologies and industry trends via tech forums
